- Job Readiness Training

**OUTER LIMITS** is a program under the Refreshing Spring Church of God in Christ (RSCOGIC) – 6200 Riverdale Road, Riverdale, MD 20737.

We look forward to partnering with you, to enhance our community.
Mission Statement

“To involve students in academically enriching, after school activities that inspire them to be self-determined learners. To encourage students to become resourceful and compassionate individuals.”

Who We Are

The Refreshing Spring OUTER LIMITS program is an approved Maryland State Department of Education (MSDE) 21st Century Community Learning Center (CCLC) program.

We deliver an engaging, innovative, after school program to eligible 3rd through 5th grade students, and provide academic support and character development.

OUTER LIMITS implements a proven method for scholastic achievement and provides a hands-on STEM education component designed to target and enhance academic concepts.

Our Students

Students in 3rd grade this year will graduate high school in 2024. It is our responsibility to ensure that our children are prepared to lead our country in the 21st Century and compete in the global marketplace.

According to a report by the Center on Education and the Workforce, there will be eight million jobs available in STEM-related fields by 2018. However, the report also indicates that the next generation of employees in America will be unprepared and unqualified to take advantage of these positions.

To be competitive in the 21st century, students need a strong academic education that includes a strong foundation in Science, Technology, Engineering, and Math (STEM), and encourages them to pursue careers in STEM-related fields.

“...the report also indicates that the next generation of employees in America will be unprepared and unqualified to take advantage of these positions.”

What We Do

We facilitates learning and foster growth by encouraging students to become abstract, creative thinkers. We assist in improving students’ skills and in-depth understanding of STEM concepts. OUTER LIMITS guides students to become strategic thinkers and global, collaborative problem solvers.

We identify and target areas of weakness in math and/or reading, and provide students with differentiated instruction and transferable techniques to assist in becoming life-long learners.

In short...We build confidence.
