## General Findings

- Our average course evaluations completion rate for the last five years is $23.43 \%$. The completion rate for just the last two years, however, jumps up to $28.23 \%$. This is due to a wide variety of marketing campaigns attempted, including emails, posters, buttons, and stickers, in addition to a stronger push from the administration.
- Over the last 5 years, the collegiate unit with the highest average completion rate ( $27.81 \%$ ) is the School of Business \& Graduate Studies (BGS). The lowest completion rate is $19.05 \%$ in the School of Professional Studies (SPS). If you narrow the data to the last two years, the College of Arts \& Sciences (CAS) has the highest average completion rate at $31.75 \%$. The collegiate unit with the lowest completion rate remains SPS at $20.53 \%$.
- The academic session with the highest average completion ( $24.92 \%$ ) over the last five years is DAY, which consists mostly of CAS courses, with a small percentage of School of Nursing \& Health Professions (NHP) courses. The lowest average completion rate is the MONTHLY academic session, which, for this time period, consists entirely of courses in the Educational Administration program in the School of Education (EDU).
- The highest completion rate average for all academic sessions was $56.05 \%$ for FALL 2014 TERM1 courses. This is due to administrative staff members attending each course to administer a 15 -minute block of time for the students to complete the course evaluations during class time.
- While there is not necessarily a remarkable difference in the completion rates as related to student status (Undergraduate, $23.70 \%$ vs. Graduate, $22.12 \%$ ), there is a noticeable difference between the average completion rates as related to faculty status. Full-time faculty and instructional staff had a five-year average of $25.94 \%$ in comparison to courses staffed by adjunct faculty members, where the completion rate was $21.18 \%$. This can be tied to both to the use of evaluation results in fulltime faculty member \& instructional staff promotion portfolios, as well as a greater turnover rate of adjunct faculty members.

| Year/Term | Group | No. of students | No. of completed evals | Percentage Completed |
